## M I C H A E L F. RUMSBY

Predominantly a landscape painter Michael has been described as an expressionist whose work borders on the abstract.

Michael works in a vibrant array of mixed media including oil, pencil, charcoal, pastels and ink, building an expressive and vital world of colour and light with multiple layers and textures on the canvas. He regularly paints on location both around his home in south western France and further afield from southern Europe to Dubai and Australia. creating radiant canvases that reflect the immediacy and brightness of nature's palette lit by the sun. Working outside also influences his style, making the final composition more representative of a scene, whereas his studio based works tend more towards abstraction.
